SUBJECTS

AAPS
"New science group," in Washington Report. James Dickinson. June, p. 24.
"Revolution?" in Washington Report. James Dickinson. April, p. 24.

ABBREVIATED NDAs (see NEW DRUG APPLICATIONS)

ANALYTICAL METHODS
CGMPs in the chemistry laboratory. Johnny Guerra. Nov., p. 38.
Laboratory evaluation of proposed NDA analytical methodology. Eric B. Sheinin. Sept., p. 82.
Laboratory robotics for testing tablet content uniformity. P. Walsh, H. Abdou, R. Barnes, and B. Cohen. Oct., p. 48.
Validation of analytical methods by FDA laboratories, I. Johnny Guerra. March, p. 74.
Validation of analytical methods by FDA laboratories, II. Martin J. Finkelson. March, p. 75.

ANIMAL EXPERIMENTATION
Reduction and replacement of the use of animals in experimentation. Andrew N. Rowan. Sept., p. 72.

APHA/APS
"Ebbs and flows," in Washington Report. James Dickinson. Feb., p. 18.

"New science group," in Washington Report. James Dickinson. June, p. 24.
"Revolution?" in Washington Report. James Dickinson. April, p. 24.
"Team spirit at APhA," in Washington Report. James Dickinson. Jan., p. 20.

AUTOMATION (see also COMPUTERS and ROBOTICS)
The basics of robotic systems. Joseph L. Kanig and Edward M. Rudnic. June, p. 28.
The development of a low-cost intelligent tablet compression monitor using a personal computer. Robert L. Jerzewski and Edward M. Rudnic. Sept., p. 32.
Development of a monitoring system for an instrumented rotary tablet press. John C. Zeiss, Barbara Beck, and Krishnalal A. Patel. August, p. 60.
Integration of automated operations. Michel D. Renard. Dec., p. 28.
Machine vision systems for pharmaceutical manufacturing. Nello Zuech. Jan., p. 28.
A review of automated dissolution testing. B.J. Compton and O.N. Hinsvark. August, p. 28.
The use of fluorescent inks in robotic vision systems. F.K. Hopkins and D.E. Hackworth. April, p. 58.
Validation concepts for computer systems used in the manufacture of drug products. PMA's Computer Systems Validation Committee. May, p. 24.

BIOAVAILABILITY/BIOEQUIVALENCE
Against indiscriminate substitution. Peter P. Lamy. April, p. 20.
A comparative evaluation of aqueous enteric polymers in capsule coatings. K.S. Murthy, N.A. Enders, M. Mahjour, and M.B. Fawzi. Oct., p. 36.
Control of drug release rates through the use of mixtures of polycaprolactone and cellulose propionate polymers. Rong-Kun Chang, James C. Price, and Clyde W. Whitworth. Oct., p. 24.
"Ethical sleaze," in Washington Report. James Dickinson. Sept., p. 26.
"Generic drug wars," in Washington Report. James Dickinson. Nov., p. 26.
"In search of corpses," in Washington Report. James Dickinson. Dec., p. 24.
Percutaneous absorption and transdermal therapy. Kenneth A. Walters. March, p. 30.

BIOTECHNOLOGY
Current issues in the scale-up of biotechnology processes. Manny Ratafia. June, p. 42.
Issues in the development of biotechnology products. William S. Kelley. March, p. 48.

CAPSULES
A comparative evaluation of aqueous enteric polymers in capsule coatings. K.S. Murthy, N.A. Enders, M. Mahjour, and M.B. Fawzi. Oct., p. 36.
"The future of hard capsules," in Washington Report. James Dickinson. May, p. 18.
Will outlawing capsules eliminate tampering? C. Joseph Stetler. May, p. 14.

CGMPs (see GOOD MANUFACTURING PRACTICES)

CHROMATOGRAPHY
Laboratory evaluation of proposed NDA analytical methodology. Eric B. Sheinin. Sept., p. 82.
Laboratory robotics for testing tablet content uniformity. P. Walsh, H. Abdou, R. Barnes, and B. Cohen. Oct., p. 48.
A review of automated dissolution testing. B.J. Compton and O.N. Hinsvark. August, p. 28.
Validation of analytical methods by FDA laboratories, I. Johnny Guerra. March, p. 74.
Validation of analytical methods by FDA laboratories, II. Martin J. Finkelson. March, p. 75.

COATING
A comparative evaluation of aqueous enteric polymers in capsule coatings. K.S. Murthy, N.A. Enders, M. Mahjour, and M.B. Fawzi. Oct., p. 36.
Control of drug release rates through the use of mixtures of polycaprolactone and cellulose propionate polymers. Rong-Kun Chang, James C. Price, and Clyde W. Whitworth. Oct., p. 24.
Evaluation of fluid-bed processes for enteric coating systems. Atul M. Mehta, Michael J. Valazza, and Stephen E. Abele. April, p. 46.
A water-based coating process for sustained release. M.R. Harris, I. Ghebre-Sellassie, and R.U. Nesbitt. Sept., p. 102.

COMPRESSION
A computerized force/displacement instrumentation system for a rotary press. James T. Walter and Larry Augsburger. Feb., p. 26.
The development of a low-cost intelligent tablet compression monitor using a personal computer. Robert L. Jerzewski and Edward M. Rudnic. Sept., p. 32.
The effects of punch-face geometry and different magnesium stearate/talc combinations on tableting properties. Birgit Mechtersheimer and Heinz Sucker. Feb., p. 38.
Tablet bond and related measurements. Everett N. Hiestand. Feb., p. 52.

COMPUTERS (see also AUTOMATION)
CGMPs in the chemistry laboratory. Johnny Guerra. Nov., p. 38.
A computerized force/displacement instrumentation system for a rotary press. James T. Walter and Larry Augsburger. Feb., p. 26.
Current issues in the scale-up of biotechnology processes. Manny Ratafia. June, p. 42.

The development of a low-cost intelligent tablet compression monitor using a personal computer. Robert L. Jerzewski and Edward M. Rudnic. Sept., p. 32.
Development of a monitoring system for an instrumented rotary tablet press. John C. Zeiss, Barbara Beck, and Krishnalal A. Patel. August, p. 60.
Integration of automated operations. Michel D. Renard. Dec., p. 28.
Machine vision systems for pharmaceutical manufacturing. Nello Zuech. Jan., p. 28.
The use of fluorescent inks in robotic vision systems. F.K. Hopkins and D.E. Hackworth. April, p. 58.
Validation concepts for computer systems used in the manufacture of drug products. PMA's Computer Systems Validation Committee. May, p. 24.
Validation of analytical methods by FDA laboratories, I. Johnny Guerra. March, p. 74.
Validation principles for computer systems — FDA's perspective. George Masters and Paul Figarole. Nov., p. 44.

CONTROLLED RELEASE (see DRUG DELIVERY)

COST CONTAINMENT
Advantages and disadvantages of overseas facilities. Frederick G. Harrison. Nov., p. 48.
An antidote for misconceptions. C. Joseph Stetler. Feb., p. 14.
Defending a priceless resource. Joseph D. Williams. Sept., p. 22.
Quality performance measurement and reporting. Robert G. Kieffer and James R. Stoker. June, p. 54.

DISSOLUTION
Laboratory evaluation of proposed NDA analytical methodology. Eric B. Sheinin. Sept., p. 82.
A review of automated dissolution testing. B.J. Compton and O.N. Hinsvark. August, p. 28.
Validation of analytical methods by FDA laboratories, I. Johnny Guerra. March, p. 74.
Validation of analytical methods by FDA laboratories, II. Martin J. Finkelson. March, p. 75.

DOCUMENTATION
CGMPs in the chemistry laboratory. Johnny Guerra. Nov., p. 38.
The development of a low-cost intelligent tablet compression monitor using a personal computer. Robert L. Jerzewski and Edward M. Rudnic. Sept., p. 32.
Development of a monitoring system for an instrumented rotary tablet press. John C. Zeiss, Barbara Beck, and Krishnalal A. Patel. August, p. 60.
Quality performance measurement and reporting. Robert G. Kieffer and James R. Stoker. June, p. 54.
Validation of analytical methods by FDA laboratories, II. Martin J. Finkelson. March, p. 75.
Validation principles for computer systems — FDA's perspective. George Masters and Paul Figarole. Nov., p. 44.

DRUG DELIVERY
Against indiscriminate substitution. Peter P. Lamy. April, p. 20.
A comparative evaluation of aqueous enteric polymers in capsule coatings. K.S. Murthy, N.A. Enders, M. Mahjour, and M.B. Fawzi. Oct., p. 36.
Control of drug release rates through the use of mixtures of polycaprolactone and cellulose propionate polymers. Rong-Kun Chang, James C. Price, and Clyde W. Whitworth. Oct., p. 24.
Percutaneous absorption and transdermal therapy. Kenneth A. Walters. March, p. 30.
A water-based coating process for sustained release. M.R. Harris, I. Ghebre-Sellassie, and R.U. Nesbitt. Sept., p. 102.

DRUG MARKETING
An antidote for misconceptions. C. Joseph Stetler. Feb., p. 14.

"Low morale at FDA," in Washington Report. James Dickinson. Sept., p. 26.
A modicum of balance. Lester M. Crawford. June, p. 20.
"Newport's rocky road," in Washington Report. James Dickinson. May, p. 20.
"Summer quackery season," in Washington Report. James Dickinson. June, p. 24.
"The end of Reagan's NDA reforms," in Washington Report. James Dickinson. Oct., p. 20.
Validation of analytical methods by FDA laboratories, I. Johnny Guerra. March, p. 74.
Validation of analytical methods by FDA laboratories, II. Martin J. Finkelson. March, p. 75.
Validation principles for computer systems — FDA's perspective. George Masters and Paul Figarole. Nov., p. 44.

Parenteral Manufacturing Opportunities

Carter-Glogau Laboratories, Inc., a leading manufacturer of small volume parenterals and lyophilized products, is currently seeking technically qualified individuals for its manufacturing operation.

Manufacturing Manager

We require an aggressive, results-oriented individual with strong leadership skills and "hands-on" experience in all phases of SVP production. Experience in ophthalmics and other sterile dosage forms is desirable. Qualified candidates will have a bachelor's degree in a scientific discipline and a minimum of 10 years technical/managerial experience in a parenteral manufacturing environment.

Manufacturing Supervisor

We require an individual with a bachelor's degree in a scientific discipline plus a minimum of 3 years supervisory experience encompassing the following areas: sterile filling, lyophilization, component preparation and inspection.

Carter-Glogau Laboratories, Inc., offers a competitive salary and benefits package and an opportunity to join a growing company that has recently relocated to its new, state-of-the-art manufacturing facility located in the "Valley of the Sun," Phoenix, Arizona. Please send resume, including salary requirements to:

Human Resources Manager
Carter-Glogau Laboratories, Inc.
P.O. Box 23160
Phoenix, AZ 85063-3160

Equal Opportunity Employer

WE MEAN BUSINESS

Jim Crumpley & Associates is a recognized leader in the recruitment and placement of professionals in the Pharmaceutical/Medical Device/Diagnostics industry. We take your career development as seriously as you do, and specialize in:

- **Production Management/Supervision**
- **Project/Process, Instrumentation, Biomedical, Facilities and Industrial Engineering**
- **Research & Development**
- **Quality Control/Assurance**
- **Regulatory Affairs/Compliance/Clinical Affairs**
- **Product Management/Operations Research/ Strategic Planning**

If you need a recruiter as specialized as you are, call or write Jim Crumpley. For career development in the health care industry, we mean business for you!

Free Newsletter available upon request.

POLYMERS
A comparative evaluation of aqueous enteric polymers in capsule coatings. K.S. Murthy, N.A. Enders, M. Mahjour, and M.B. Fawzi. Oct., p. 36.

SCIENTIFIC AFFAIRS DIVISION

Reid-Rowell, an expanding U.S. pharmaceutical firm, is a member of the Solvay Pharmaceutical Group of Solvay and Cie S.A. of Brussels, Belgium and is located in Marietta, Georgia, only 20 minutes from Atlanta.

We are pleased to offer the following positions:

RESEARCH SCIENTIST, PRODUCT RESEARCH AND DEVELOPMENT

This position requires experience in the preformulation and formulation of tablets, capsules, oral liquids and suppositories, as well as novel delivery systems. Experience in establishing raw material specifications, physical stability evaluations, operation of pilot plant equipment, and knowledge of CGMP and GLP's is necessary. Experience in preparation and packaging of clinical supplies is desirable.

The position requires a B.S. in Pharmacy and at least an M.S. in pharmaceutics and a minimum of 3 years of appropriate industrial experience. Good oral/written communication skills are essential.

REGULATORY AFFAIRS COORDINATOR

Responsible for assisting in the coordination and preparation of documents for submission to governmental agencies for new and existing drug products.

The position requires a B.S. degree in pharmacy or related field, and 2-3 years of experience involving U.S. regulatory work in drug submissions. Good communication and interpersonal skills are essential.

Interested candidates are requested to send resume and salary requirements in confidence to:

Mr. Charles Ramsburg • Manager, Human Resources

REID-ROWELL

901 Sawyer Road • Marietta, Georgia 30062

An Equal Opportunity Employer M/F

Director of Quality Assurance

Repligen Corporation is a rapidly growing biotechnology company involved in the development of a variety of innovative peptide and protein products by recombinant DNA and conventional biochemical techniques.

Responsibilities include Quality Control testing and release of finished products, work in process, and raw material components; validation protocols for both equipment and processes; serving as responsible head in matters regarding FDA; interfacing with the Process Development aspects of new products that will ultimately have diagnostic or therapeutic applications; and supervising QC Associates and Technicians.

Position requires an M.D. or a Ph.D. in microbiology, biochemistry or related field plus a minimum of 3 yrs. experience with products manufactured according to CGMPs. Experience with FDA submissions for product licensing is a plus.

Repligen offers a competitive salary, excellent benefits and equity participation. Submit cover letter, resume, salary requirements and references to: Personnel Manager, Repligen Corporation, One Kendall Sq., Bldg. 700, Cambridge, MA 02139. An Equal Opportunity Employer.

RepliGen

Control of drug release rates through the use of mixtures of polycaprolactone and cellulose propionate polymers. Rong-Kun Chang, James C. Price, and Clyde W. Whitworth. Oct., p. 24.

POWDERS (see also TABLETS AND TABLETING)

Careful drying of temperature-sensitive pharmaceutical granulates in a high-frequency field. T. Köblitz, G. Körblein, and L. Ehrhardt. April, p. 32.

The effects of punch-face geometry and different magnesium stearate/talc combinations on tableting properties. Birgit Mechtersheimer and Heinz Sucker. Feb., p. 38.

Monitoring mass transfer processes to control moist agglomeration. H. Leuenberger and G. Imanidis. March, p. 56.

Preparing tablet granulations in a 100 cu ft solids processor. A. John Scarpone, Umesh G. Dalvi, and Albert E. de Lorimier. Sept., p. 44.

Tablet bond and related measurements. Everett N. Hiestand. Feb., p. 52.

PROCESS CONTROL

Careful drying of temperature-sensitive pharmaceutical granulates in a high-frequency field. T. Köblitz, G. Körblein, and L. Ehrhardt. April, p. 32.
